Submitter Comments:

I am against this bill as the falsification of birth certificates should not be allowed. A sane society recognises and functions on the reality of biological sex. Self-Identification threatens women's sex-based rights. Predatory men will change their sex marker from M to F as that is what predators do, they will use any loop hole to gain access to victims, everyone knows this. Besides this bill being insulting to women and misogynistic, it is authoritarian telling men, women and children that we can't state what is right in front of our own eyes and describe what is obvious -whether someone is male or female. Self-identification puts women and children in danger if men are allowed to "self ID" (basically self-declaration), that they are a member of the opposite sex when are they clearly not and enter women's and children's single-sex spaces. Women, men, girls and boys have sex-based rights based on our biological sex. It's a basic human right. Men, women and children deserve privacy and dignity in their single sex spaces (bathrooms, change rooms, locker rooms, hospital wards, dv shelters, homeless shelters, prisons etc). Safety for women and girls is also a major concern. Most men who LARP or cosplay as women do it for sexual reasons, most are heterosexual and 80% still have their penis and males retain male pattern violence even after "transitioning". Most "trans women" (men who call themselves women) have autogynephilia that clusters with other paraphillias (sexual perversions) like paedophilia, necrophilia etc. You cannot change sex, every cell is sexed. "Born into the wrong body" pseudo science. A "gender identity" is a gendered soul that cannot be seen, verified or measured. The law shouldn't collude with a deception, lie or delusion. Labor and the Greens are completely betraying women and children with this atrocious and frankly evil policy. ICAC needs to investigate Labor and the Greens for corruption, especially Shannon Fentiman and every MP supporting this bill. Every assault, rape, harassment and murder of women and children under this bill will be on every MP's conscience who voted for it. The scandal and damage will be massive. I look forward to the day that you are all investigated, sacked, sued and hopefully arrested. I will make sure that everyone knows your name and face and that you voted for this bill and ACTIVELY put women and children in danger. Selling out your state and country for pharmaceutical industry money is also grounds for treason.
