

Births, Deaths and Marriages Registration Bill 2022

Submission No: 281
Submitted by: Blaine Davis
Publication: Making the submission and your name public

Submitter Comments:

All people deserve to have their identity recognised, accepted, respected, and affirmed regardless of their medical history. There are many reasons why trans and gender diverse people may not undergo surgery (risk of complications/death, prohibitive costs, availability, preference, etc.) and they deserve validation as much as anyone else. Formal recognition of a person's gender can make a remarkable impact on a person's well-being and can be the difference between life and death. Please do the right thing and support these changes. Choose kindness. Thank you.
