Submitter Comments:

As a non binary person who would love to relocate to QLD, i want changes made that allow me to die and not be violently misgendered. I want to be able to aelf ID as no one can quite tell me what surgeries make me non binary. Can you answer that question for me. Does turning my vulva and vagina into a penis make me non binary to you? If so thats a bit odd to me since i do not want a penis. The current laws around non binary people legally changing gender markers is blicked by these surgery requirements that do not apply to us across the board.
