Submitter Comments:

I am a 71 year old women who had a very bad experience in a hospital in 1985. I was in a psychiatric hospital because this was my only escape from a alcoholic abusive husband. There were two beds in the room. I felt safe for the first time in ages until the put a transgender person in with me. This person looked female but had the personality of an aggressive male. I was subjected to his/her continued talking about sexual activity in detail. This has traumatized me to this day. It has caused tears as I write this. Please do not let these transgender men in with woman. There needs to be a seperate area for them. If we accept them in society surely they are a third gender type.

Women need to be protected at all cost especially in institutions. I am not against the transgender people as I have a couple that I know well. To give rights to one group that can harm another is abhorrent for a Government to even consider.
