Subject: Re Inquiry into preventing electoral fraud

Firstly it is hard to put in a submission when your sites are still under construction and can not be opened .

If you people are serious about stopping electoral fraud it is about time that all polling booths in each electorate were connected by computer so as soon as some one votes their name is taken off the electoral roll for that election this stops people from casting multiple votes, Also take away pencils from polling booths and make it that all ballot forms are filled out in pen so they can not be tampered with .All vote cast out side the voters area ( postal votes ) should have to be in pen .

Electoral Funding and the amounts that are spent on elections in each electorate should also have a ceiling amount for each candidate and or party

Their should also be a stop put on parties from not contesting elections in electorates because they have a deal with other parties not to contest a seat that the other party is standing a candidate ( ie Nationals standing in a certain seat so the Libs do not stand a candidate ) This does not give the people of each electorate the choice of parties to vote for if you want to vote say Libs and their is no liberal candidate because they will not contest the seat because of a deal with the Nationals .

MR SCHUBACK ADDED THAT:

\* ALL PERSONS COME TO VOTE SHOULD BE MADE TO SHOW SOME SORT OF IDENTIFICATION TO PROVE THEY ARE WHO THEY SAY?
