Subject: Amendments

Categories: Submission

1. I am writing to ask these amendments be made. As a person who has had the misfortune of being 'treated' with electroshock, and suffering the consequences of said treatments, I can assure you that it is barbaric and life shattering.
2. The *Qld Mental Health Act* is amended to ban electroshock, restraint, seclusion, deep brain stimulation and dramatically increase criminal fines and prison terms for ill-treatment of a patient.
3. Involuntary detainment and treatment is eliminated from the *Qld Mental Health Act* per the World Health Organisation guidance.
4. Every death in in the mental health system is investigated for criminal culpability and negligence and any misconduct involving prescription practices is also reported to police for criminal investigation.
5. Existing money is re-directed to proven workable solutions that do not harm and money is only given to organisations that are held fully accountable and are actually producing results
