Submission to the Queensland Parliament Primary Industries and Resources Committee

Re: *Queensland Institute of Medical Research Bill 2025*

The Association of Australian Medical Research Institutes (AAMRI) welcomes the opportunity to provide feedback on the *Queensland Institute of Medical Research Bill 2025* (the Bill).

AAMRI is the peak body for medical research institutes across Australia.

Our [member institutes](#), including QIMR Berghofer Medical Research Institute (QIMR), work on a broad spectrum of human health issues such as preventive health, chronic disease, mental health, immunology and Indigenous health. Their research ranges from fundamental biomedical discovery through to clinical research and the translation of research findings.

Effective legislation is critical to ensuring the continued success and operational integrity of QIMR. We therefore support efforts to modernise the legislative framework governing the Institute, aligning it with contemporary governance standards and the evolving priorities of biomedical research.

Yours sincerely

Dr Saraïd Billiards
Chief Executive Officer
Association of Australian Medical Research Institutes
