I drive for Uber and have a car
for Uber, I have been driving for
many years. I like to meet new people
talk with them and get them to observe
they go safely. As you pay a personal
insurance on the vehicle you drive why
should you pay extra to suit others.
This is put a fee for using the car
as well is just to decrease and due to the
taxi, not losing work. We are doing the
state and people a favor being cheaper and
close for pick up ~~and~~ we save people money
and you want to take from us doing a great
deed. If this happens I will have
to stop and be unemployed and it's that
what government want more unemployed
more
