Subject: New laws

Im writing to state my case against these proposed laws I drive uber for the reasons that the money i make out of uber gives my family the extra benefits that my normal job can not provide if i have to pay more fees my kids would loose these extra bits that they enjoy. Why should there be more fees it is hard enough to get ahead in life especially living in one of the dearest countries in the world we are so overtaxed that if we make extra money the government tries to take that as well so please dont put anymore charges on us who try to get ahead and do the best for our family
