Subject: Letter to QLD Govt

My name is Anthony Fisher. I have started driving for the Cairns Uber service. Mostly because there is already a breach of employers paying under award wages, and non compliance with rates, which force me to work for myself. The expenses and cost to my vehicle are already high and it is only just profitable to go on the road.

It has already cost me a lot of money to work for Uber, and it would be unjust to change legislation mid -stream in a matter that you have just approved. The people I help and drive appreciate the system because the taxis have had a monopoly on the service and over charge. If you--the government --increase feed for me, because you want a piece of the pie, I can assure you that the political impact will soon be understood by your voters, who already have a deepening sense of distrust of your duty.

Anthony Fisher
