Committee Secretary

Public Works and Utilities Committee

Parliament House, George St, Bne Qld. 4000

Sir/Madam:

Good morning. This won't take long as everyone will have the same grievances for all of us UBER drivers. I am glad particularly on how the system work for UBER giving descent jobs for Queenslander. Especially I came from a non advantaged country,that we suffer a lot of poverty over there.

I am now capable of taking my family overseas to The Philippines for holiday because of my earnings from UBER. I was nearly declare bankrupt recently but managed to rise up again from starting driving UBER Eats and UBER X. I nearly lose everything coz of my little income as casual in my other job. My wife has her own personal loans, a hefty personal loan. That made our living a hard one.

If the Qld government will impose additional rates for drivers meaning I will be staying on the road longer hours. My family need me , my kids need a family tight bonding especially after work and weekends.

So please make it easy for Queenslander. We are also tax payer. This is a new era. We need to move forward.

Hoping for your kind consideration;

Oliveros Arago Robles

UBER driver
