Why do I use Uber?

Uber currently provides me with a reliable, efficient and personable mode of transport. During times where I am running late or heading to a business meeting, I can count on the reliability of the service and here is why:

- I have the ability to rate and comment on the professionalization of the driver.
- I have the ability to track the current movements on my phone via the map.
- The security that this system provides not only through driver validation but through online supports allows for a better journey.

This is something that I can not only use in my professional life but I can use in my spare time, with friends. I have the ability to Fare Split, I have the ability to order an XL Class car, I have the ability to Order an UberSELECT. The variety of options with the comfort of rating / tracking creates the best experience for myself and the community.

Regards,
Dan
