Hi Im owner operator of Limousine Business 28 years in Brisbane. Im have been badly affected by the Government Decesion to allow Uber to operate without regulations which I have been doing for a long time it needs to be faier so we all can compete on a Level playing field in its present form its not. Limousine should operate under the L plate so people have a choice, Limousines or Taxis or Shareride. There are some people driving around on private plates doing Uber work and pretending at same time to be a Limo u cant have it both ways and Corporates want to see a L plate on the car so they know they are getting and for security some people I pickup are doing Million dollar deals in the back seat while Im driving them a Limousine is not a share ride we need to make this Law no L plate no working or advertising limousine Services this way it makes if fair for me and let the market sort its self out it will take 5 years for my industry to recover so Im begging the commitee to listen to my concerns and act on them please sorry Im late with email been trying to work and survive to pay bills regards Peter Brisbane Premier Limousine
