Subject: Submission re Repeal of Wild Rivers Act

Dear Queensland Government,

I strongly object to the proposed legislation seeking to repeal the entire Wild Rivers Act. The Wild Rivers Act was introduced after considerable public debate and is the product of genuine democracy. Its provisions allow positive integration of economic, social and environmental goals. By contrast, the currently proposed legislation is being hurried through without reasonable community consultation or public debate. The changes would eliminate protections for an extraordinary amount of natural resources and the quality of life of future generations. Please DO NOT ALLOW the repeal of the Wild Rivers Act. I support the submission of the Wilderness Society on this matter.

Yours sincerely,

Thomas Colley
