Tully

Queensland 4854

Submission No. 22

To the State Development, Infrastructure and Industry Committee,

On behalf of the members of the Tully branch of the Wildlife Preservation Society of Qld, I would like to make the following comments by way of submission on the proposed amendments. As residents of important catchments flowing into the GBR we support the continued protection of the riparian vegetation in these catchments. We also feel that it is equally important to continue the protection of critical habitat for endangered species like the cassowary and the mahogany glider, especially connecting corridors. Therefore we hope that this protection can be built into your new Amendment.

Yours faithfully,

Suzanne Smith, President , WPSQ Tully and district
