I, as a Queensland primary producer, strongly support the changes you have proposed with this Bill.

My production type is Sugar Cane & Beef Cattle

The land tenure on my property is Freehold & Leasehold

I have Remnant Vegetation found on my property Yes

I have High Value Regrowth Vegetation found on my property No

My main issue/s with the current vegetation management framework is: Overly complex process to obtain a development application/permit for vegetation management
The length of time taken to obtain a development approval/permit for vegetation management
The length of time to utilise a permit/development approval is too short (currently 5 years) and doesn't allow for long-term property planning
Incorrect mapping
Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure)
Over-administration or administration of vegetation management by inexperienced departmental staff
