I, as a Queensland primary producer,	strongly support the changes you have proposed with this Bill.
My production type is	Beef Grazing
The land tenure on my property is	Freehold
I have Remnant Vegetation found on my property	Yes
I have High Value Regrowth Vegetation found on my property	Yes
My main issue/s with the current vegetation management framework is:	<p>Overly complex process to obtain a development application/permit for vegetation management</p> <p>The length of time taken to obtain a development approval/permit for vegetation management</p> <p>The length of time to utilise a permit/development approval is too short (currently 5 years) and doesn't allow for long-term property planning</p> <p>Incorrect mapping</p> <p>Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure)</p> <p>Over-administration or administration of vegetation management by inexperienced departmental staff</p>
If this Bill is passed it will mean the following for my property in terms of improved productive, environmental and/or social aspects:	The ability of easier access to thinning permits and the removal of unnecessary red-tape. The freedom to run your property without fear of being prosecuted!
