I, as a Queensland primary producer, strongly support the changes you have proposed with this Bill.

My production type is Beef

The land tenure on my property is Freehold

I have Remnant Vegetation found on my property Yes

I have High Value Regrowth Vegetation found on my property Unsure

My main issue/s with the current vegetation management framework is: Incorrect mapping Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure) Over-administration or administration of vegetation management by inexperienced departmental staff

If this Bill is passed it will mean the following for my property in terms of improved productive, environmental and/or social aspects: It will create more certainty in my management decisions allowing me to retain vegetation without fear of being unable to harvest in future.
