

**Submission Date** 2013-04-04 20:14:49

**Date** 04-02-2013

**I, as a Queensland primary producer,** strongly support the changes you have proposed with this Bill.

**My production type is** Beef Cattle

**The land tenure on my property is** Freehold

**I have Remnant Vegetation found on my property** Yes

**I have High Value Regrowth Vegetation found on my property** Yes

**My main issue/s with the current vegetation management framework is:**  
Overly complex process to obtain a development application/permit for vegetation management  
The length of time taken to obtain a development approval/permit for vegetation management  
The length of time to utilise a permit/development approval is too short (currently 5 years) and doesn't allow for long-term property planning  
Incorrect mapping  
Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure)  
Over-administration or administration of vegetation management by inexperienced departmental staff

**If this Bill is passed it will mean the following for my property in terms of improved productive, environmental and/or social aspects:**  
-Increased Ground cover  
-Less erosion  
-Lower grazing pressure  
-Reduced hazard risk eg:bushfire  
-Reduced red tape to undertake general property improvements eg: fencing, waters,roads  
-Reduced red tape to undertake fodder harvesting in drought  
-Allow scope for further property development in the future

**If I could propose further changes to the legislation these changes would include:**  
-Properties need to be re-mapped on a INDIVIDUAL basis  
-All areas previously cleared/wrung/poisoned, no matter when it occurred, should be mapped accordingly and allowed to be developed further

**Full Name** Greg Bryant
