I, as a Queensland primary producer, strongly support the changes you have proposed with this Bill.

My production type is cattle

The land tenure on my property is freehold

I have Remnant Vegetation found on my property No

I have High Value Regrowth Vegetation found on my property No

My main issue/s with the current vegetation management framework is: Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure) Over-administration or administration of vegetation management by inexperienced departmental staff

If this Bill is passed it will mean the following for my property in terms of improved productive, environmental and/or social aspects: This Bill will allow us and others in our industry to manage our properties without the unnecessary hinderance of overregulation. Fencelines, firebreaks, roads etc are an essential and necessary part of property management. This Bill will help the industry as a whole, and therefore us individually, to be more productive and so better able to support our families and communities while still being able to sustain environmental practices.
