**Date** 04-09-2013

**I, as a Queensland primary producer,** strongly support the changes you have proposed with this Bill.

**My production type is** Mixed grazing & cropping.

**The land tenure on my property is** Freehold

**I have Remnant Vegetation found on my property** Yes

**I have High Value Regrowth Vegetation found on my property** No

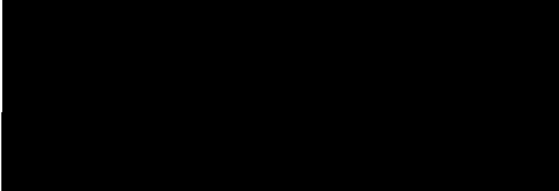

**My main issue/s with the current vegetation management framework is:**  
Overly complex process to obtain a development application/permit for vegetation management  
Incorrect mapping  
Over-administration or administration of vegetation management by inexperienced departmental staff

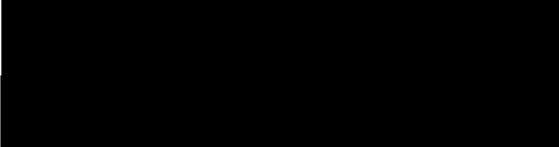

**If this Bill is passed it will mean the following for my property in terms of improved productive, environmental and/or social aspects:**  
Allow better opportunities to implement development plans on my property.  
Improved productivity and ease of management of grazing areas eg visibility, mustering etc.  
Increased pasture growth/better ground cover leading to reduced erosion & runoff, hence less environmental damage.

**If I could propose further changes to the legislation these changes would include:**  
At this stage on my property I don't see the need for further legislative changes.
