Date 04-08-2013

My production type is Mixed Farming

The land tenure on my property is Freeholding

I have Remnant Vegetation found on my property Unsure

I have High Value Regrowth Vegetation found on my property Unsure

My main issue/s with the current vegetation management framework is:
Overly complex process to obtain a development application/permit for vegetation management
The length of time taken to obtain a development approval/permit for vegetation management
The length of time to utilise a permit/development approval is too short (currently 5 years) and doesn't allow for long-term property planning
Incorrect mapping
Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure)
Over-administration or administration of vegetation management by inexperienced departmental staff

If this Bill is passed it will mean the following for my property in terms of improved productive, environmental and/or social aspects:
Freeing up of red tape
