**Date** 04-09-2013

**My production type is** cattle

**The land tenure on my property is** grazing

**I have Remnant Vegetation found on my property** Yes

**I have High Value Regrowth Vegetation found on my property** Yes

**My main issue/s with the current vegetation management framework is:**  
Overly complex process to obtain a development application/permit for vegetation management  
The length of time taken to obtain a development approval/permit for vegetation management  
The length of time to utilise a permit/development approval is too short (currently 5 years) and doesn't allow for long-term property planning  
Incorrect mapping  
Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure)  
Over-administration or administration of vegetation management by inexperienced departmental staff

**If this Bill is passed it will mean the following for my property in terms of improved productive, environmental and/or social aspects:**  
improve the country where couldn't before.  
build up numbers and have a better lifestyle.  
be able make wider roads fire breaks through standing timber

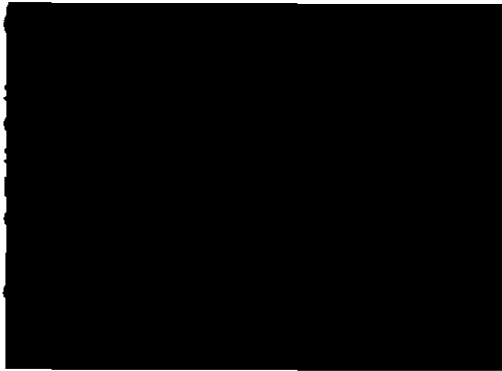

**If I could propose further changes to the legislation these changes would include:**  
leasehold be able pull more standing timber---75percent of each paddock or property area.  
The properties that were stopped pulling due to others over pulling  
be now catch up by being able to pull areas  
Areas of standing timber now over grown with younger timber and be able pull this now.
