Date 03-26-2013

I, as a Queensland primary producer, strongly support the changes you have proposed with this Bill.

My production type is Beef Cattle

The land tenure on my property is Freehold and Leasehold

I have Remnant Vegetation found on my property Yes

I have High Value Regrowth Vegetation found on my property Yes

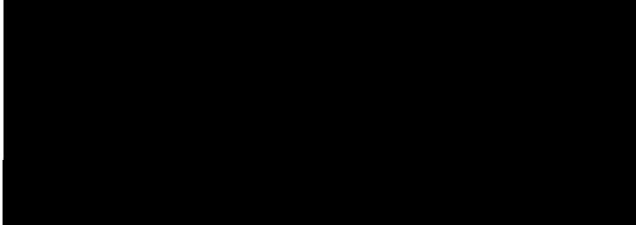

My main issue/s with the current vegetation management framework is:
Overly complex process to obtain a development application/permit for vegetation management
Incorrect mapping
Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure)
Over-administration or administration of vegetation management by inexperienced departmental staff

If this Bill is passed it will mean the following for my property in terms of improved productive, environmental and/or social aspects:
Reduction of weeds and feral animals in areas of Remnant veg. Increased and better quality production. A feeling of security over your developed areas. Renewed enthusiasm towards production gains and benefits and generally.

If I could propose further changes to the legislation these changes would include:
Routine maintenance to be even more broader than what they currently are. Have some faith in our rural sector as custodians of the land.
