**Date** 04-09-2013

**I, as a Queensland primary producer,** strongly support the changes you have proposed with this Bill.

**My production type is** Beef cattle

**The land tenure on my property is** pastoral holding/ freehold

**I have Remnant Vegetation found on my property** Yes

**I have High Value Regrowth Vegetation found on my property** Yes

**My main issue/s with the current vegetation management framework is:**  
Overly complex process to obtain a development application/permit for vegetation management  
The length of time taken to obtain a development approval/permit for vegetation management  
The length of time to utilise a permit/development approval is too short (currently 5 years) and doesn't allow for long-term property planning  
Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure)  
Over-administration or administration of vegetation management by inexperienced departmental staff

**If this Bill is passed it will mean the following for my property in terms of improved productive, environmental and/or social aspects:**  
It will allow us to do general property improvements (ie fence lines) and increase productivity.

**If I could propose further changes to the legislation these changes would include:**  
Revise PMAV maps in place, and be able to be more flexible with what can and cant be done, be allowed to make changes to them.
