I, as a Queensland primary producer, strongly support the changes you have proposed with this Bill.

My production type is GRAZING & FARMING

The land tenure on my property is FREE & LEASE HOLD

I have Remnant Vegetation found on my property Yes

I have High Value Regrowth Vegetation found on my property No

My main issue/s with the current vegetation management framework is: The length of time to utilise a permit/development approval is too short (currently 5 years) and doesn't allow for long-term property planning Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure) THERE SHOULD BE NIL EXPIRY ON PERMITS
