**Date** 04-10-2013

**I, as a Queensland primary producer,** strongly support the changes you have proposed with this Bill.

**My production type is** Cattle

**The land tenure on my property is** Perpitial Lease

**I have Remnant Vegetation found on my property** Yes

**I have High Value Regrowth Vegetation found on my property** No

**My main issue/s with the current vegetation management framework is:**  
Overly complex process to obtain a development application/permit for vegetation management  
The length of time taken to obtain a development approval/permit for vegetation management  
The length of time to utilise a permit/development approval is too short (currently 5 years) and doesn't allow for long-term property planning  
Overregulation of activities that are routine and essential to the management of my property (for example clearing for fence lines, firebreaks, roads, or infrastructure)

**If this Bill is passed it will mean the following for my property in terms of improved productive, environmental and/or social aspects:**  
I can thin my woody weads more efcitvly & control regroth along fence lines.

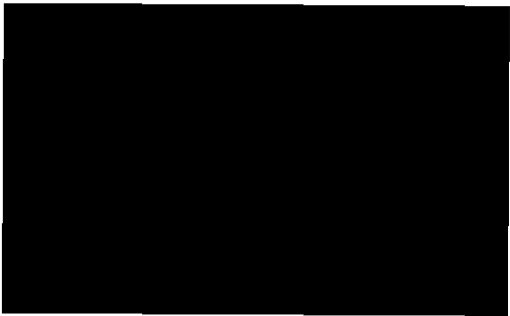

**Full Name** David Luke
