## E-mobility

I believe that there is little more to say other than,

1)“It is very disconcerting to be travelling legally on the road at the speed limit, and you are passed by an e-bike or scooter doing in excess of the speed limit either on the road or on the foot path”

or

2)“ You are walking on the foot path and as these bikes quietly approach from behind wanting to pass you at above walking speed with often not one but up to three passengers, this also applies to those that are riding towards you”
