This is a copout by your Government. We all know what has to happen but the State Government does not have the backbone to bring in laws to fix the e e scooter/e bike problem. There has been many people killed so far so it's about time you fixed the problem. Firstly....get them registered so people can get a number plate when they get hit, like I have been hit. Secondly...Do what NSW have done and ban them on roads where the speed limit is 60kph or above. No riding on footpaths where pedestrians are. Thirdly ...back up the new laws by confiscating these e bikes /e scooters. Exactly the same way that you confiscate peoples boats for catching and keeping undersize and female crabs.

It's not difficult. It just needs some political backbone
