**Submitter Comments:**

The E-bike. E-Scooter is almost gone too far and I am not sure if it can be controlled. This is quite simple. Once a bike exceeds the 25km limit they should be treated as a motor cycle, ultimately they are a motor vehicle. Just because they are electric doesn't mean they are not. Tesla vehicles are electric and still need to abide by the laws. Registration should apply and License should apply.

Give the police the power to disable a bike/scooter exceeding 25km.
