Submitter Comments:

I have 2 safety concerns: E bikes & scooters on footpaths and around shopping centres are a hazard for pedestrians, especially older people & people with disability aides as they are not as flexible to accommodate changes in directions. E bike travelling silently at speed on public roads with young people in control, and often with passengers is concerning for their safety. Young riders are not yet trained to use roundabouts & often transition inadvertently between lanes causing a hazard for themselves and others.
