Submitter Comments:

We need specific laws and rules on all forms of motorised transport devices especially e-bikes & e-scooters. The majority users of e-bikes & e-scooters think they can use them on roads, footpaths and walkways at high speed without care or thought for foot traffic. I can no longer enjoy the wonderful pathways around Robina as they seem to be overtaken with these devices. Driving has also become a hazardous event as bikers, e-bikers, e-scooters etc ignore basic road rules including speeding through red lights, zebra crossings etc. If motorised mobility devices require registration then ALL motorised devices that can travel over 6km / hr should require registration and issued with legislated laws/rules around their use. There also needs to be laws & rules relating to the purchasing & selling motorised devices that can travel over 6km /hr.
