I am an experienced bike rider, motorcycle rider and car and truck driver. I have ridden e bikes for about 8 years and commute 52km a day when I use them. I think the benefits of these personal vehicles are great. I would suggest-raise speed allowed to 32km/hr on road introduce a free number plate system per Ebike so you police these speeds more bike lanes higher penalties for no helmet, no number plate etc consider full face helmets slower speeds to 10km/hr on footpaths and allow their use on all footpaths at that max speed introduce rebates for e motorcycles Here in qld these vehicles have great environmental, health, congestion, and financial benefits for almost all people Thankyou and all the best!
