Submitter Comments:

Racks of ebikes in various locations (scooters also), many of which are lying on their side or spralled over foot paths creating walking hazards for pedestrians. On walking paths they make no noise, and their speed causes the elderly fear so as they are reluctant to take exercise that is a must for good physical and mental health. Traveling on a straight road recently at the speed limit of 70k/hr a Scooter passed me, dodging from road to footpath when approaching traffic lights that were red to avoid stopping. Police seem to have their hands tied due to ineffective or no legislation relating to e scooters and bikes
