### **Submitter Comments:**

This brief submission is to express concern about the rising danger to pedestrians, especially older people, caused by the variety of E Mobility devices that are driven along pavements/ footpaths etc at speed. Very often it is intimidating and there is scant regard for pedestrian safety . There needs to be stronger guidance and if necessary enforcement of any laws relating to this basic safety issue. I would suggest that where possible these devices are prohibited from public pavements and their use restricted to bike lanes as a starting point.
