### **Submitter Comments:**

Clarity needs to be provided over the use of these machines on the road. My submission is made on my experience that I see more of them being used on the road, outside of a bike lane. In addition, I play touch football at the peregrian springs oval and too many times the fields have been torn up due to these machines. On a recent touch football event these machines were riding up and down between the fields being used. There seems to be a need to crack down on the use of these machines and while police probably have better things to do it is getting closer to a point where a fatality will occur.
