Submitter Comments:

There are many benefits to our community from allowing e-scooters and e-bikes such as reduced car congestion, accessibility for those with minimal public transport options and they take up less space than cars so create a more liveable city or town. Yes there are also risks which can be managed by reduced speed limits. Local councils need to create active transport corridors that provide for walking paths, and separate cycling/scooter paths with clear speed limits. I understand there will be many people complaining about kids on scooters but I wish to advocate for young and older people to have access to e-bikes and e-scooters as accessible, safe and efficient transport which can help create communities with higher value amenities than car parks and roads,
