Submitter Comments:

I think that e-scooter reform is needed, not with harsher laws, but with higher education on how to use an e-scooter, and the laws that abide with them, also, with e-bikes, they don't need much reform at all, they are much safer and stable compared to e-scooters, and can handle higher speeds much more safely and effectively, with the exception of the highly illegal e-bike conversion kits which need to be abolished.
