Submitter Comments:

Don't forget the elderly\disabled riders who use the equipment as mandatory exercise requirement. Can't go up hills without electrical aid. Need assistance on return journey due to fatigue. Give us more range by not restricting power. Battery size and motor wattage should be irrelevant under 1000w . If I want to ride my ebicycle 50 klm and back with pedal assist I should be able to in Queensland. Don't react to the behaviour of a population minority doing the wrong thing by destroying the freedom and enjoyment of the population majority. Idiots will always find a way of express their bad behaviour no matter the rules and regulations . Don't restrict our freedom by excessive police intervention on the population behaving appropriately. If the focus point is these hire scooters then work on the electronics so they won't operate without a pressure switch in the helmet is activated with the helmet at all times to be within 2 meters of an operating device.
