Submitter Comments:

E scooters and e bikes form a valuable part of a diversified and environmentally friendly means of transport for both people without drivers licenses, and people who want to travel short distances for leisure, but without contributing to worsening traffic on the Sunshine Coast and in Brisbane City. The state government, and local governments, should focus funding on safe travel corridors (i.e veloways) that can be shared by PMD's and bicycles, skateboards and traditional scooters which are separate to public walkways, but also separate to public roads, to avoid risk from motor vehicles from those riders.
