Submitter Comments:

E scooters and bikes make walking on the footpath a danger, if hit by one of these there is no identification on them, the rider doesn't have to be licensed , no third party to pay for injuries. The same applies when they are operated on the road, it seems as though the road rules only apply to registered vehicles. A lot of the operators of these vehicles assume they have the same rights as a car when on the road and the same rights as a pedestrian when on a walkway, ie pedestrian crossing. I believe the operation of these vehicles should require some sort of training, That they are not permitted on pedestrian walkways, Identification affixed to vehicles, Compulsory third party insurance.
