Submitter Comments:

These motorised vehicles that cannot have drivers identified have become dangerously out of control. They are young teens generally intimidating and harrassing people of all ages and walks of life. Myself as a pedestrian a runner a cyclist and road user is constantly impacted and harrassed by these teens. My elderly mother is terrified and regularly taunted. My eldley neighbours are harrassed and then they race off remaining completely anonymousNone of them young or old adhere to the 12k/hr on foot paths with school children flying by as you walk . They are protected with anonymity this needs to be rectified They need to be banned for U18 they need to be registered so law breakers and criminals .Alternatively ban the private ownership all together They take over roads footpaths cycle lanes. And ride them illegally regularly. No helmets 2 or 3 on kne electronic vehicle speeding whilst looking at their phones laughing as they taunt you as they ride by dangerously close and fast They have gone unchecked and un policed for far too long. A community at its wits ends . Ban them completely simple solution and just have the speed managed lime bikes the only option This has gone on far too long
