### **Submitter Comments:**

We have three children and live on a steep hill on the southern Goldcoast. Our children use their bikes to access all the amazing amenities available in this part of the world. We have proactively educated our kids about appropriate use of their e-bikes and interaction with other road users and in some cases pedestrians. My submission requests the following: Increase the assisted speed limit to 32 km/h Raise the legal power limit, as 250W may be insufficient for hill climbing under load Allow throttle use up to the legal speed limit, just like pedal assist Align Queensland's laws with other states to avoid limiting product availability
