Submitter Comments:

I would like to see e scooters and bikes: Banned from footpathsTherefore riders will need to be licensed to use them on the road .Registered : so that there is at the very least 3rd party insurance available so that when pedestrians get mowed down there is a mechanism in place to help with medical incurred . If we must have them they need to be speed limited and technologically rendered incapable of being hotted up . These things are not toys they are lethal weapons in the hands of children and adults . The commercially available ones for hire also litter footpaths and public areas where riders appear to abandon them . This needs to be stopped as footpaths and walk ways should only be for pedestrian use . Not a fan !Thank you for considering my submission .
