**Submitter Comments:**

I love e-bikes and use one to get my children to and from school and sporting events in our local area. We have done over 2000km in the last 8months and that has reduced congestion by removing our vehicle from the roads and car parking facilities. I would like to see the following: Increase the assisted speed limit to 32 km/h Raise the legal power limit, as I have found my 250W insufficient for some of the steeper hills in our area Allow throttle use up to the legal speed limit, just like pedal assist
