Submitter Comments:

I support the registration and regulation of e-mobility devices (such as e-scooters and e-bikes) in a way that treats them more like motor vehicles than recreational toys. These devices are increasingly used for commuting and urban transport, and I believe they should be registered similarly to cars or motorcycles, with clear rules for road use, insurance, and safety compliance. This will help improve accountability, encourage responsible use, and protect both riders and the general public.
