### **Submitter Comments:**

After experiencing two near collisions at Coolum Beach and having rocks thrown at me by youths two up on electric motor bikes (with pedals) I contacted my local representatives office about the problem and offered the same advice that I offer to you today. Any electric bike, either with pedals or without, that is capable of travel at speeds above those determined safe by relevant authorities should be an illegal import and stopped at our borders. None of these machines are manufactured in Australia. Stop the importation, end the problem before it starts. Include any machine that can, or has shown to be manipulated electronically to increase speed after importation. Stop this problem AT THE BORDER of Australia, as we currently do with drugs and guns, these things are just as dangerous!!! Don't pass the consequential problems associated with these machines down to the various downstream agencies. STOP THEM ENTERING AUSTRALIA IN THE FIRST PLACE.
