To Whom It May Concern,I am writing to provide my views regarding the use and safety of e-scooters in Queensland. With the increasing popularity of e-scooters as a convenient mode of transport, I believe it is essential to implement regulations that ensure both rider and public safety.Firstly, I strongly support the introduction of mandatory registration for all e-scooters used in public spaces. Registration would help authorities identify vehicles involved in accidents or unsafe behaviour, and encourage responsible ownership.Secondly, I recommend imposing a speed limit on e-scooters, especially in high pedestrian traffic areas. Limiting speeds to 15-20 km/h can significantly reduce the risk and severity of collisions.Additionally, I suggest enforcing the use of helmets for all riders, regardless of age, to minimize head injuries. Clear signage and designated e-scooter lanes could also help separate riders from pedestrians and vehicles, reducing the likelihood of accidents.Finally, regular safety campaigns and education programs would raise public awareness about responsible e-scooter use.Thank you for considering these suggestions to improve the safety and regulation of e-scooters in Queensland.Yours sincerely,Kwok Wong
