Submitter Comments:
I object to the following part of the proposal: providing an expedited pathway for the delivery of Games venues and villages and the construction of Games-related transport infrastructure identified in the Act by removing the requirements for compliance with relevant Acts relating to development and use (other than building work and cultural heritage) and limiting review rightsWhile an expeditious process is needed, it must not run roughshod over existing planning and approval frameworks. The games are supposed to deliver legacy infrastructure - but creating games infrastructure that does not take into account legacy aspects, particularly how they fit within planning and building frameworks is totally inappropriate.
