Submitter Comments:

Victoria Park would be severely damaged and reduced by the proposed stadium. This means its historic and natural value would be destroyed and a place of refuge close to the CBD would be lost. Many people use the park for a variety of reasons and its vegetation is also important in filtering the air of the city, as well as providing home for wildlife. The green space offers a place for people to relax, when visiting the city and it also attracts visitors from other parts of Queensland and interstate. The heritage laws that the state government want to over-ride are crucial to preserving our human and natural history and they must not be tampered with. If the state government proceed with this, it will seriously damage our democracy as well as the heritage of our city.
